Important Note :

The code number refers to a single item, whether it is a single piece component or a set of parts.
 The column "delivery" quantity refers to the standard factory packaging for the part or the set of parts.
 The indicated quantity or, its multiple shall therefore be used when ordering.

The Danfoss product range for the refrigeration and air conditioning industry contains:

Compressors for Refrigeration and air conditioning

These products include hermetic reciprocating compressors, scroll compressors and fan-cooled condensing units. Typical applications are air conditioning units, water chillers and commercial refrigeration systems.

Compressors for Refrigerators and Freezers

This part of the range includes hermetic compressors and fan-cooled condensing units for household refrigerators and freezers, and for commercial units such as bottle coolers and drinks dispensers. We also offer compressors for heat pumps, and 12 and 24 V compressors for refrigerators and freezers in commercial vehicles, and boats.

Appliance Controls

Danfoss offers a range of customer-specific electromechanical thermostats for refrigerators and freezers, electronic temperature controls with or without display, and service thermostats for use when servicing refrigeration and freezing appliances.

Refrigeration and Air Conditioning Controls

Our full product range covers all control, safety, system protection and monitoring requirements in mechanically and electronically controlled refrigeration and air conditioning systems. The products are used in countless applications within the commercial and industrial refrigeration and air conditioning sectors.
