Common defrost start / Common start after defrost
Gemeinsamer Abtau anlauf / Gemeinsamer Anlauf nach Abtauung
Enclenchement dégivrage commun / remise en route après dégivrage

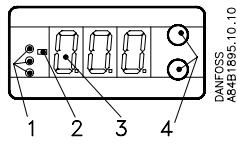

Installation

For panel mounting

Electrical connection

The controllers must be connected separately:
transformer of min. 3 VA.

Operation

- Light emitting diode

= refrigeration
 = defrost
 = fan running

Flashes slowly at setting
Flashes fast at alarm

- Minus sign
- Display
- Keys for programming and setting

- Press upper key for 2 s.
- Press lower key for 2 s.
- Press both keys at the same time.

What to do	Initial controller setup	Operating the two pushbuttons	Resulting controller setup
<i>Read or change parameter codes and settings</i>	Normal operation (or alarm) Unknown codes and settings		DANFOSS A84B1886.10 Normal operation (or alarm) Known codes and settings
<i>Re-establish all factory settings</i>	Unknown settings		DANFOSS A84B1887.10 All parameter settings = factory settings
<i>Read defrost sensor temp.</i>	Normal operation or alarm		DANFOSS A84B1888.10 Normal operation
<i>Read the other sensor temp.</i>	Normal operation or alarm		DANFOSS A84B2064.10 Normal operation

Common defrost start / Common start after defrost
Gemeinsamer Abtau anlauf / Gemeinsamer Anlauf nach Abtauung
Enclenchement dégivrage commun / remise en route après dégivrage

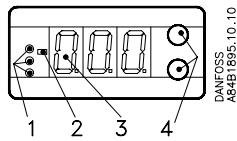

Installation

For panel mounting

Electrical connection

The controllers must be connected separately:
transformer of min. 3 VA.

Operation

- Light emitting diode

= refrigeration
 = defrost
 = fan running

Flashes slowly at setting
Flashes fast at alarm

- Minus sign
- Display
- Keys for programming and setting

- Press upper key for 2 s.
- Press lower key for 2 s.
- Press both keys at the same time.

What to do	Initial controller setup	Operating the two pushbuttons	Resulting controller setup
<i>Read or change parameter codes and settings</i>	Normal operation (or alarm) Unknown codes and settings		DANFOSS A84B1886.10 Normal operation (or alarm) Known codes and settings

Common defrost start / Common start after defrost
Gemeinsamer Abtau anlauf / Gemeinsamer Anlauf nach Abtauung
Enclenchement dégivrage commun / remise en route après dégivrage

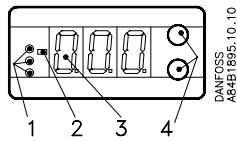

Installation

For panel mounting

Electrical connection

The controllers must be connected separately:
transformer of min. 3 VA.

Operation

- Light emitting diode

= refrigeration
 = defrost
 = fan running

Flashes slowly at setting
Flashes fast at alarm

- Minus sign
- Display
- Keys for programming and setting

- Press upper key for 2 s.
- Press lower key for 2 s.
- Press both keys at the same time.

What to do	Initial controller setup	Operating the two pushbuttons	Resulting controller setup
<i>Read or change parameter codes and settings</i>	Normal operation (or alarm) Unknown codes and settings		DANFOSS A84B1886.10 Normal operation (or alarm) Known codes and settings
<i>Re-establish all factory settings</i>	Unknown settings		DANFOSS A84B1887.10 All parameter settings = factory settings
<i>Read defrost sensor temp.</i>	Normal operation or alarm		DANFOSS A84B1888.10 Normal operation

Installation

For panel mounting

Electrical connection

The controllers must be connected separately:
transformer of min. 3 VA.

Operation

- Light emitting diode

Flashes slowly at setting
Flashes fast at alarm

- Minus sign

- Display

- Keys for programming and setting

Press upper key for 2 s.

Press lower key for 2 s.

Press both keys at the same time.

What to do	Initial controller setup	Operating the two pushbuttons	Resulting controller setup
<i>Read or change parameter codes and settings</i>	Normal operation (or alarm) Unknown codes and settings		Normal operation (or alarm) Known codes and settings
<i>Re-establish all factory settings</i>	Unknown settings		All parameter settings = factory settings
